**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14, drawn to a shared multi-user e-mail system, classified in class 709, subclass 206.
  - II. Claims 15-18, drawn to an electronic mail method for allowing emails to be encrypted or digitally signed, classified in class 713, subclass 176.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention I recites a multi-user e-mail system configured to run on a shared computer configured to enable a plurality of users, one at a time, to access the system running on the shared computer. The subcombination has separate utility such as embedding a public key into an email.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
